

# GUARANTEE

051206

GB

# CERTIFICATE

## *Cable Kit, Multiflex, Thermoflex Kit*

The guarantee is only valid on condition that an authorised electrical contractor does the installation. To make the guarantee valid, the guarantee slip has to be filled in with the test report together with the specification of material or the contractor on completion of the work signs invoice sheet.

Other costs in addition to this are not covered by the guarantee.

The guarantee is invalid if faults are caused by damage, interference with previous approved assembly or action that is contrary to current regulations.

The guarantee covers faults in material for 10 years concerning heating cable/mat(s) and 2 years for other components.

EBECO AB  
Ebbe Larsson, Managing Director

Faults are to be reported to and verified by the authorised electrical contractor. The guarantee slip and appertaining invoice/delivery slip are to be presented in connection with guarantee claims.

Electrical installation by

-----  
According to enclosed specification of material.

Faults covered by the guarantee are repaired or replaced by EBECO without charge to the purchaser regardless of whether it is a question of repairs or replacement of material.

**NOT PERMITTED TO DRILL, SCREW OR FIT MAT EDGES TO THE FLOOR IN THESE PREMISES!**

If flooring is to be replaced, the new material must be suitable in conjunction with underfloor heating. Do not place insulating material or furnishing fixed to the floor on the surfaces where underfloor heating is installed, this would otherwise reduce heat transfer to the room and cause elevated temperature.

A detailed sketch showing exact positions of cables and any electrical points and rated power is to be posted on the distribution board. A photograph should suitably document the installation. Also note the length and rated power of the heating cables on the schematic sketch. Mark the drawing with the respective number from the test report.
